The site got some cosmetic attention today. Comments and suggestions are welcomed.

Also, the [Cemetery List](#) was added in the Genealogy section. The list had to get edited a bit to fit in the new format, so I hope nothing got too messed up. Please speak up if you notice something wrong. There will be some improvements to this function in the near future, so stay tuned.

Also we've now got some basic timeline events in the Genealogy section. To see an example of these in action [click here](#).
