Actually Linda the 1900 census is what started me questioning my great grandfather's death date because he was born in Mar 1864 and he was married in Mar 1886 (14 years). My great grandmother is listed as being a widow in the 1900 census at their home place. So more questions arose for me. I cannot locate a William E. Lee in the 1910 census anywhere in WV.

Are you aware of any physician or personal records that might have been kept in this timeframe? What alternative records might be available in the Roane Co area that I could check on?
