Program:

Long-time Society member, Mike Hill, made an interesting & well-planned presentation about focusing on "family genealogy." His purpose was to motivate and get members interested in discussing their ancestors and family surnames at the different society meetings as part of the society's regular programming. He is looking to do something, structurally, that will enhance today's technology-based family research. He distributed the Bonnett/Meadows Pedigree Chart (his wife's ancestors) which generated discussion among others present who are researching or have ancestors of the same families.

The meeting adjourned at 8:05 p.m., with a variety of delicious refreshments being served by Shirley Hill.

The next meeting will be held on the 3rd Thursday of November which is November 15th. The

program will involve a presentation on use of D.N.A. in forming ancestral connections. Melissa Swisher and Carol Board-Westfall will lead the discussion.
