This help article covers the [Main](#) and [User](#) Menus.

#### Main Menu

Main Menu
Home
Articles
Genealogy
Surnames
Photos
Forums
Calendar
Links

The "Main Menu" shows the various sections of our website. Just click on the section of interest. Some sections have additional options that will become visible while you are in that section, for example, a "Submit" option where you can add new content. Also, some sections will have sub-sections as well, for example, the "News" and "History" areas in the "Articles" section.

#### User Menu

User Menu
View Account
Edit Account
Notifications
Inbox
Logout

When you are logged in, there is another menu visible below the Main Menu, the "User Menu." These menu items are to view and control things related to your account. You can, for example, choose [Edit Account](#) to change your e-mail address, enter personal information you would like to share such as your Real Name, Location and Interests, and enter messenger system contact information. The [Notification](#) and [Inbox](#) sections are each covered in separate sections.
