This help article covers [Subscribing](#) and [Changing](#) Notification Options.

Throughout the site there are "Notification Options" sections which give you the opportunity to subscribe to specific notifications. A notification is simply a message sent by the system to inform you that some event has occurred. For example, in the Forums, you can choose to be notified of new topics, or in Articles, you can choose to be notified of new comments on a specific article. Another example is the Surnames section, where you can choose to be notified when anyone registers interest in the same surnames you have registered. The Notification Options in Surnames look like this:

Notification Options		
Category	<input type="checkbox"/>	Events
Surnames	<input checked="" type="checkbox"/>	Notify me if someone else registers any of my surnames.
	<input type="checkbox"/>	Notify me whenever someone registers any surname.
<div>Update Now</div>		

Notification method is: private message [[Change](#)]

You can subscribe to the notifications by checking the box beside the item you are interested in, and clicking the Update button. When a box like this is shown, it will show any options you have already subscribed to with the box already checked. You can uncheck the box and click the Update button to unsubscribe.

User Menu
View Account
Edit Account
Notifications
Inbox (1)
Logout

There are enough possibilities, that you might like to see all the things you have subscribed to in one place, and that place is the [Noifications](#) section of the User Menu. As well as viewing the list, you can also choose to unsubscribe to events by checking the box(es) to remove and clicking the "Delete" button.

Active Notifications

<input type="checkbox"/>	Event	Category	ID	Name
<input type="checkbox"/>	Module: Forums			
<input type="checkbox"/>	New Post	Forum	2	Queries
<input type="checkbox"/>	Module: Photos			
<input type="checkbox"/>	New Photo	Global		
<input type="checkbox"/>	Module: Surnames			
<input type="checkbox"/>	Same Surname	Surnames		
<input type="button" value="Cancel"/> <input type="button" value="Clear"/> <input type="button" value="Delete"/>				

Notifications can be sent in one of two ways, that you can control from the [Edit Account](#) section of the "User Menu." One way is by e-mail, and the system will send the notifications to the address you specified on your account. The other option is using the Private Message feature that is available from the [Inbox](#) section of the User Menu. Both options create the same messages, but one way you view them on the website, the other way through your own email. Here is a sample notification message:

[Roane County Historical Society, Inc.] auto-notify : SMITH registered

Hello user,

A new surname has been added in the Surnames module at our site.

The details are:
Surname: SMITH
Researcher: user
Notes:

Follow this link for details:
<http://www.wvroane.org/modules/surnames/list.php?surname=SMITH>

To see the most recent Surname registrations, follow this link:
<http://www.wvroane.org/modules/surnames/list.php>

You are receiving this message because you selected to be notified anytime someone registers a Surname which matches one that you have entered.

If this is an error or you wish not to receive further such notifications, please update your subscriptions by visiting the link below:
